Hi,

I've taken a look at VT0309-US1 and it looks A-OK to me. A couple of comments, but no show-stoppers:

- 1) the title mentions only ICDs, but this invention could just as easily be applied to pacemakers; however, claim 1 states "implantable cardiac rhythm management device" so that seems to be general enough.
- 2) page 5, lines 24-26 mention "pair of obtusely angled housing surfaces 13, 14" which should probably be 14, 15 according to figure 1. Same change in line 2: "The angle of the surfaces 13, 14 is about 120 degrees" should also be 14, 15.

Thanks, and sorry for taking so long about reviewing it, it's been a busy few weeks.

—Casey

I have been alternately on vacation, then piled high with other projects, so I have not had a chance to review it thoroughly. I will make an attempt this week. Sorry.

Hi Casey:

How's the review of patent application VT0309-US1 going?
